

Answer Key:

I. 1. Perimeter of a Rectangle = $2(l + b)$ Units = $2(4+3) = 2(7) = 14\text{cm}$

2. Perimeter of a square = $4 \times \text{side units} = 4 \times 7\text{cm} = 28\text{cm}$

II. 1. Area of a Rectangle = $l \times b$ Sq units = $4.3 \times 2.1 = 9.03 \text{ cm}^2$

2. Area of a Square = Side \times Side Sq units = $12 \times 12 = 144 \text{ cm}^2$

Perimeter of a garden = $2(l + b)$ units = $2(30+15) = 2(45) = 90\text{m}$

Cost of 1m fencing = ₹100

Cost of 90m fencing = $90 \times ₹100 = ₹ 9,000.$
